

Thank you for visiting the Ascon Pool Products stand at the Splash Pool and Trade Show 2008

Splash Pool and Spa Show, was held in Queensland from 30-31 July, 2008. We appreciated all who visited our stand during these very busy days.

The show gave us an excellent opportunity to showcase our products and to introduce our company. Thanks to all our current clients for the loyal and continued support

and to the new visitors who have expressed interest in our company and our products.

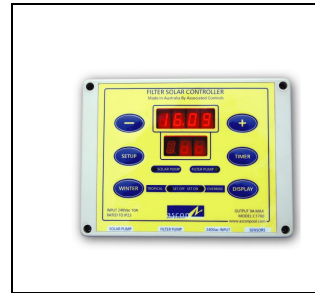

Ascon Pool Products showcased 2 of our most popular products and 2 new products recently released to the market.

MS3D Solar Controller

MS3D-UD Solar

UFS Filter/ Solar control

AHT Heat pump Control

MS3D – The traditional Solar controller, tried and true available now ex stock.

MS3D–UD – The solar controller with temp probe in the pipe going up to the roof and one coming down from the roof, This controller takes out the need for a roof sensor should the roof sensor become impossible to repair.

UFS – The Ultimate Filter/ Solar controller is designed for an intergrated filter solar system, overriding the filter pump when there is solar gain this unit allows the max heat transfer from the solar system into the pool.

AHT – The Ascon heater controller is designed to control the pump of a dedicated heating line, turning on the pump every hour to sample the water temp the controller will stay on if needed or turn off for another hour.

We were delighted to see the great interest and positive response we received to our products.

Please let us know if you would like to receive further information about the products we showcased at the Show.
