

ASCON POOL PRODUCTS NEWSLETTER

October 2008

Welcome

This is the 2nd Ascon Pool Products newsletter and the season is well and truly underway. Ascon Pool Products would like to hear any feedback, suggestions, comments or ideas to make on this the newsletter to make it a more informative read.

To all our customers we really appreciate your business. If you need any help or would like us to come and visit you to go through and demonstrate both our old products and new, please call and book a time that suits you with our receptionist.

ACPS Power Separator

The Ascon Pool Products Power Separator or ACPS as its known is a simple protection unit that draws it power from the mains to reduce power draw through the chlorinator when more than one pump is plugged in.

For more information, prices or how the ACPS can help you please contact anyone at Ascon (02) 9642 4922.

Australian Owned – Australian Made

During this time of economic uncertainty buying from an Australian owned and an Australian Made company Helps keep Jobs in Australia, Keeps profits in Australia and all round keeps the Australian economy going. Apart from building business for Australia, promoting jobs and industry development, buying Australian Made also builds pride in national achievement.

Ascon Pool Products manufacture their equipment from the Blank PCBs right through to final assembly right here in Oz. Our state of the art electronics facility in Greenacre Sydney, is constantly running electronic control PCBs Drop in and see it all in Action.

And Another Thing.....

Congrats

Also a Big Congratulations to Jacob our service Tech for passing his forklift licence, and a warning to all who dare to venture into our store.

Can Ya Get it?

There are two islands and a boat, the first island has a Cop, Crim, Father, Mother, 2 Girls and 2 Boys.

The aim is to get them all to the other island

Here are the conditions:

- 1.) Crim cannot be left alone with any family members.
- 2.) Only 2 people on the boat at one time, but only the cop, father and mother can drive the boat.
- 3.) The mother cannot be left with the boys unless the father is there.
- 4.) The father cannot be left with the girls unless the mother is there.

All I can suggest is you give each thing above a little scrap of paper and work it out like that.

For the answers log on to <http://www.asconpool.com/contactus.html> Click on to the Ask a Question and check if you got it right.
